

**The biggest chip
powering
the fastest AI**

Cerebras WSE-3

4 Trillion Transistors
46,225 mm² Silicon

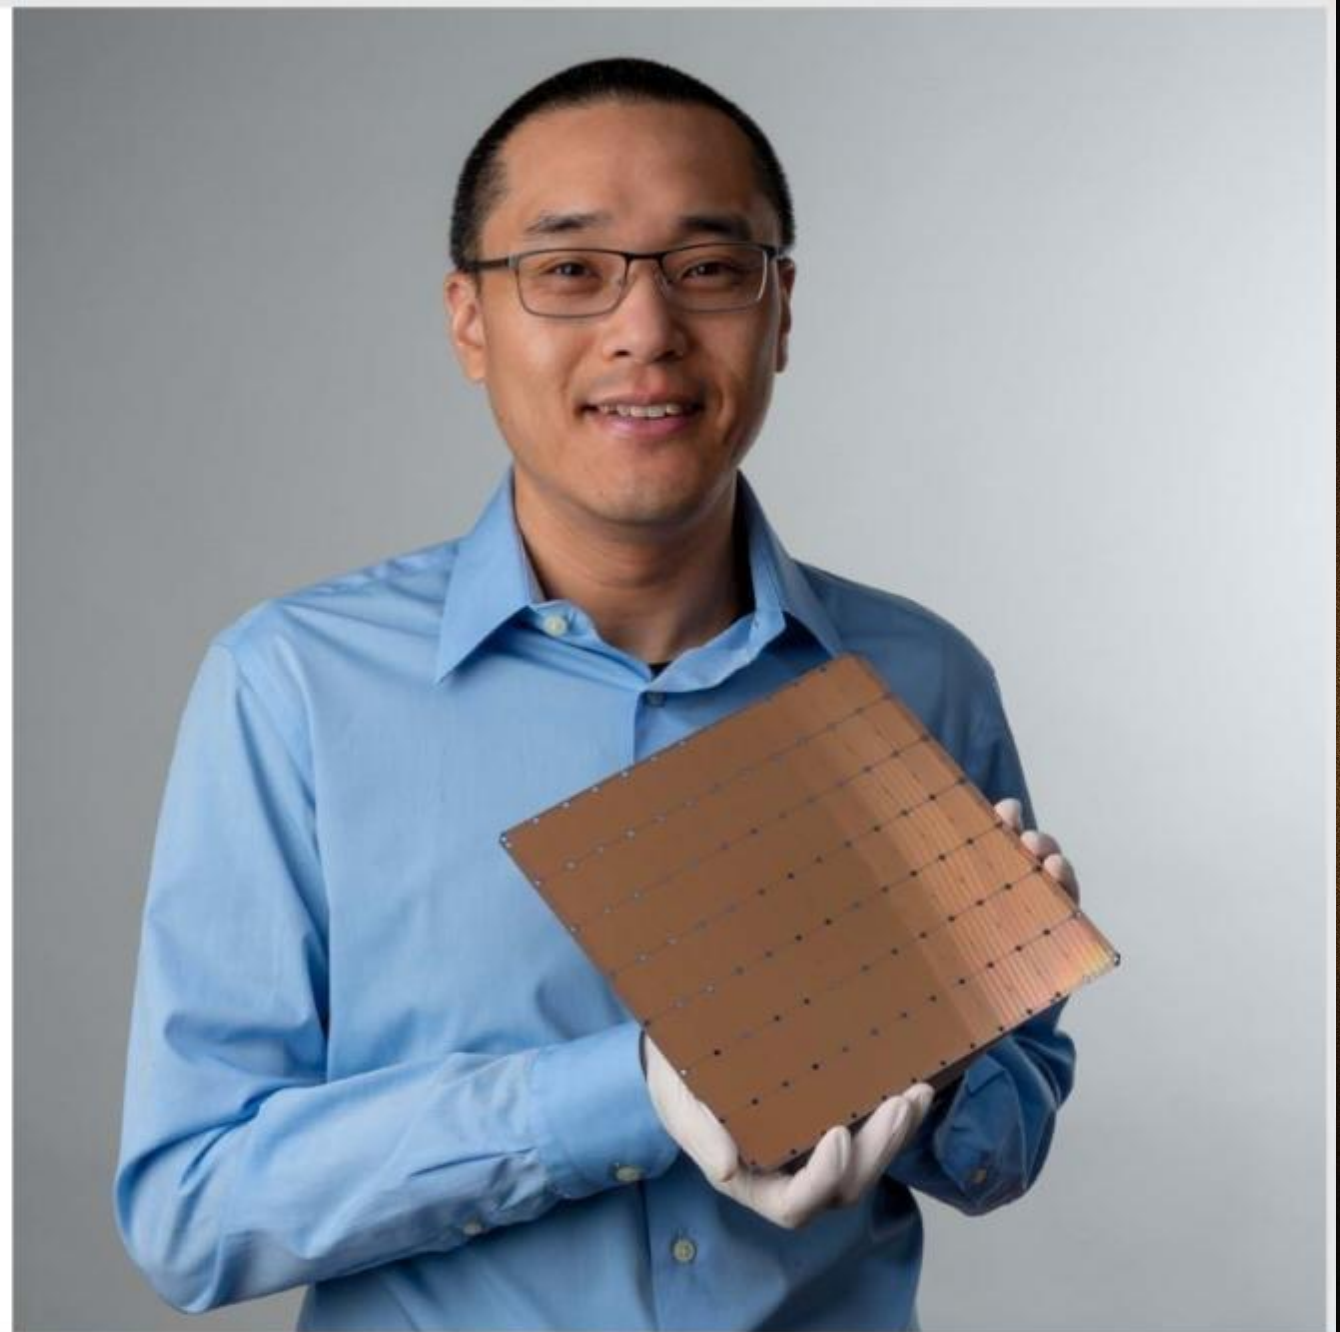

NVIDIA B200 Package

208 Billion Transistors
~1,600 mm² Silicon
(Combined)

Largest Chip Ever Built

- 46,225 mm² silicon
- 1.2 trillion transistors
- 400,000 AI optimized cores
- 18 Gigabytes of On-chip Memory
- 9 PByte/s memory bandwidth
- 100 Pbit/s fabric bandwidth
- TSMC 16nm process

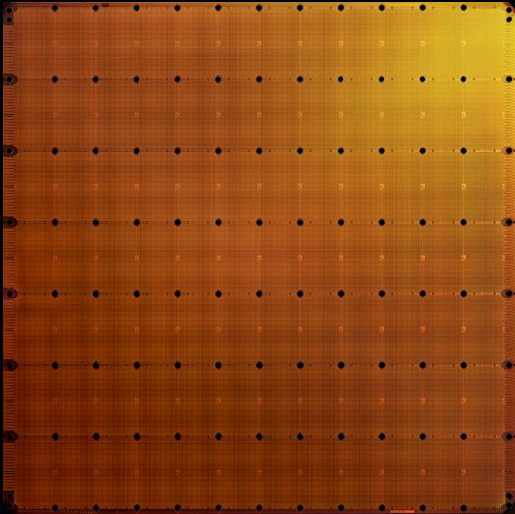

Pioneering Innovation in Chips, System, Cluster and Software

Performance comes from tight integration of all four

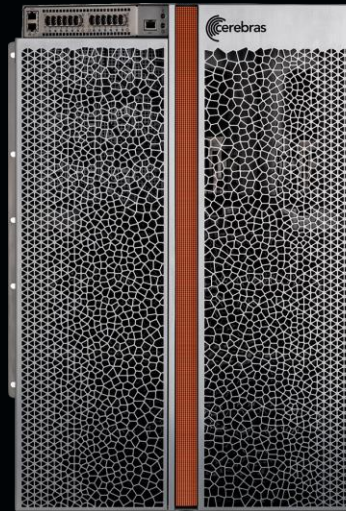

Wafer-Scale Engine

AI Processor

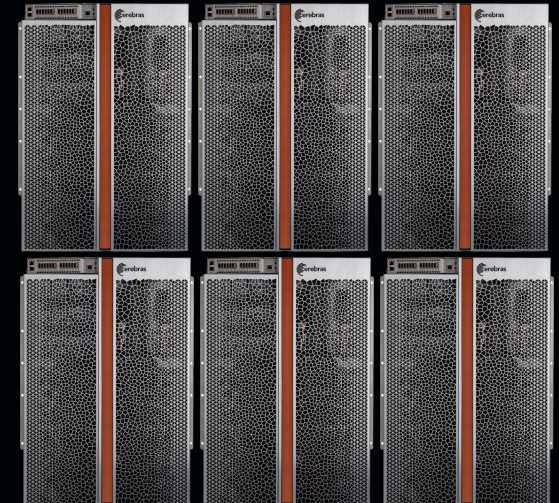

CS-3 Server

Rack-scale System

Cerebras AI Clusters

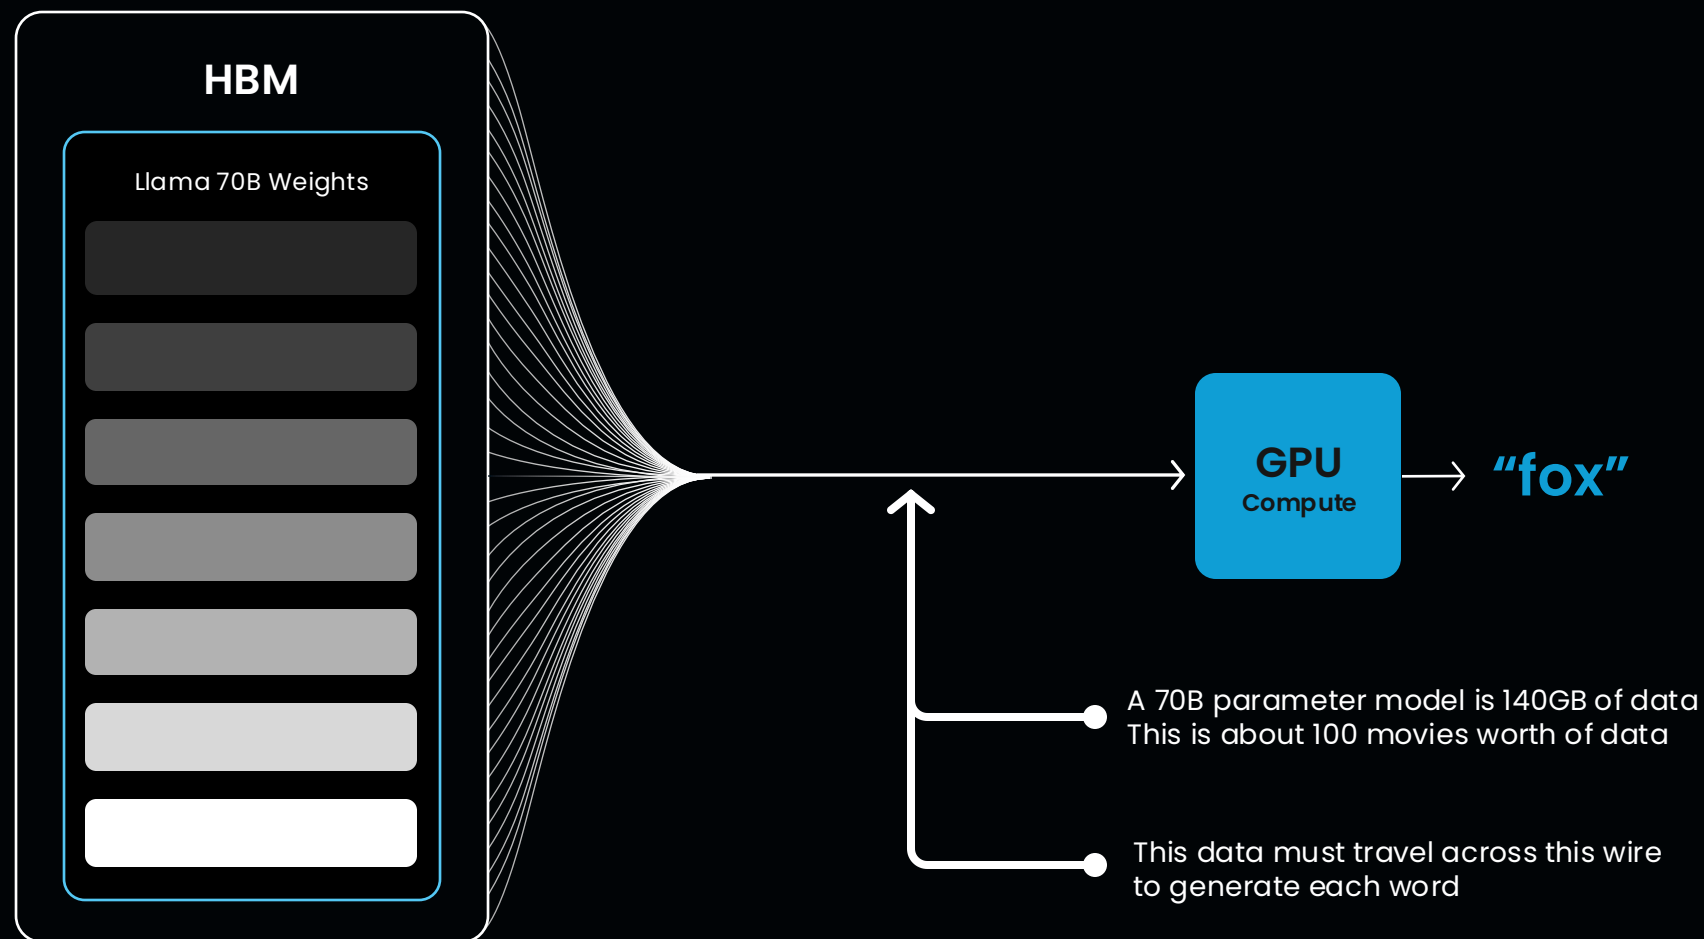

Multi-Rack Clusters

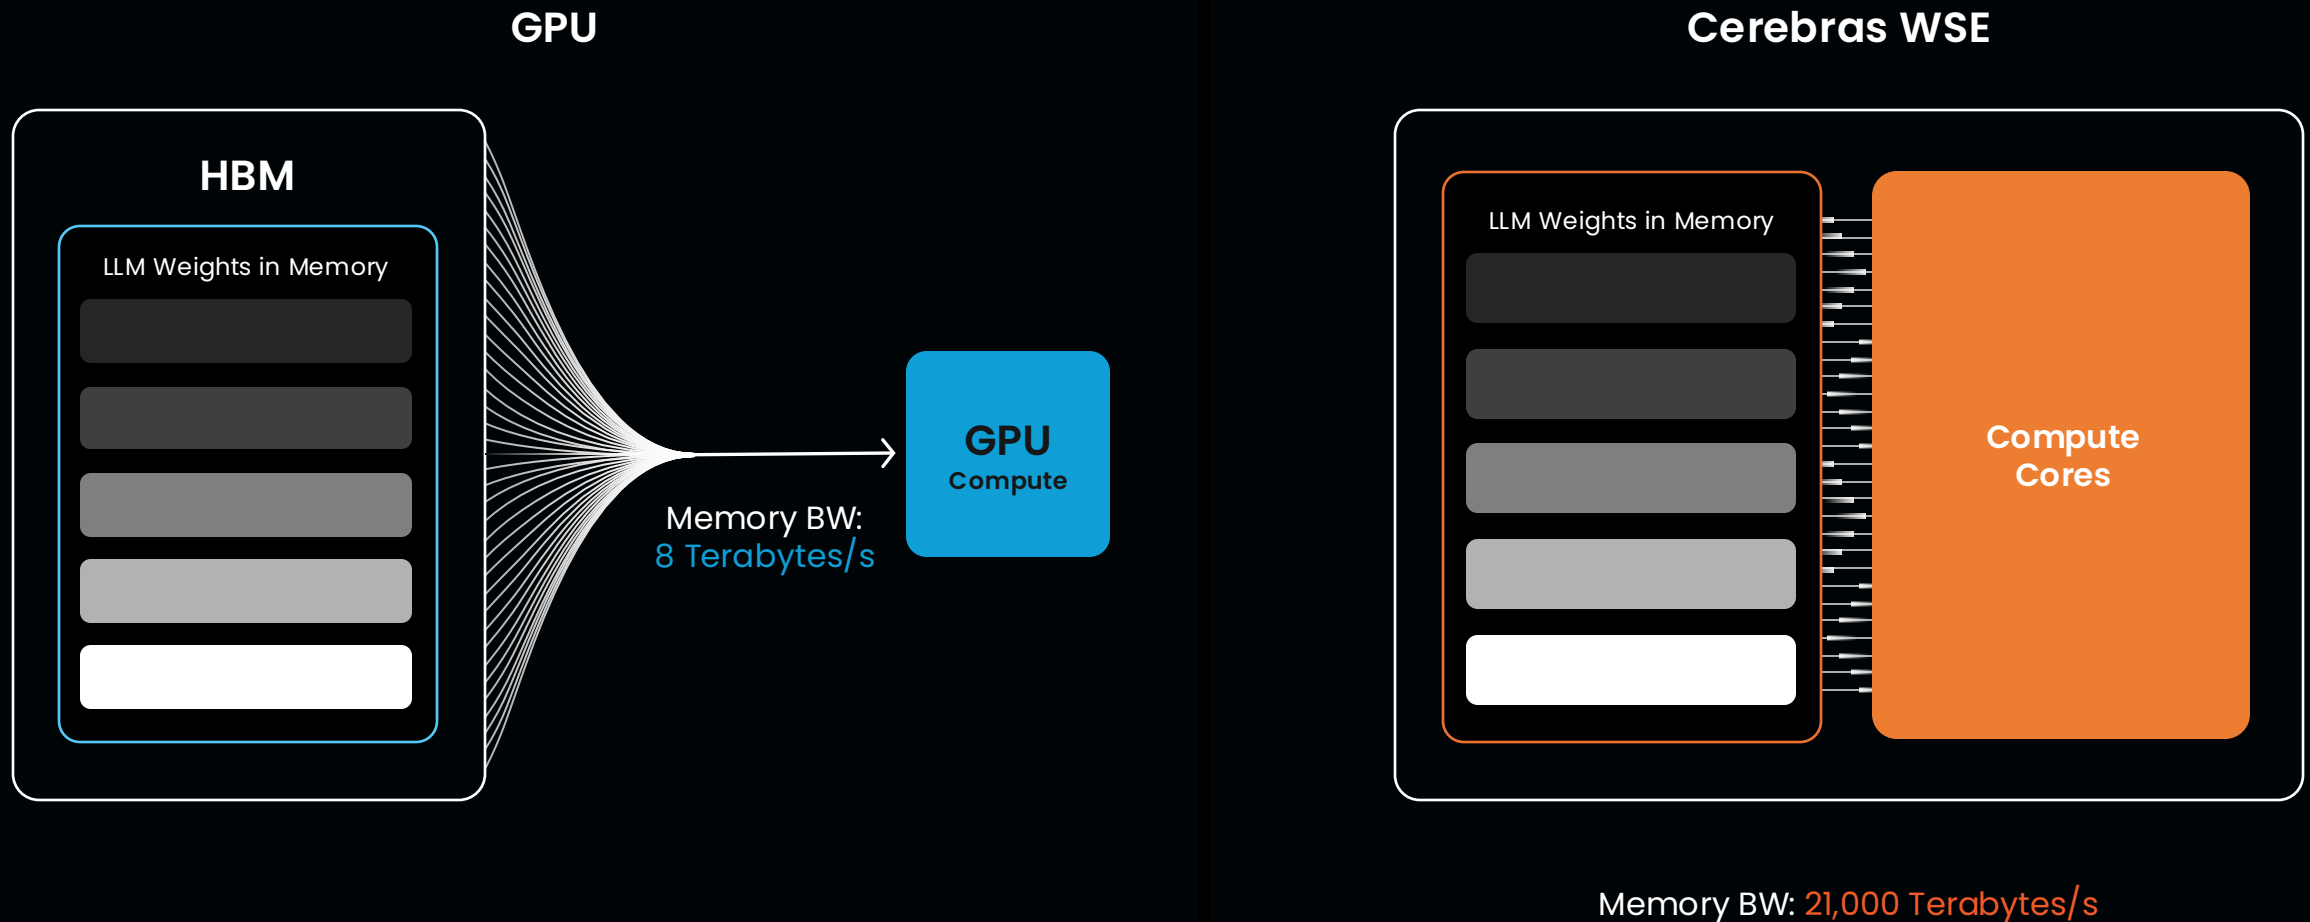

GPU Architectures Are Limited By Memory Bandwidth

In a GPU, HBM memory is off-chip, far away from the compute.

Moving weights from HBM to compute takes times and **produces slow** inference.

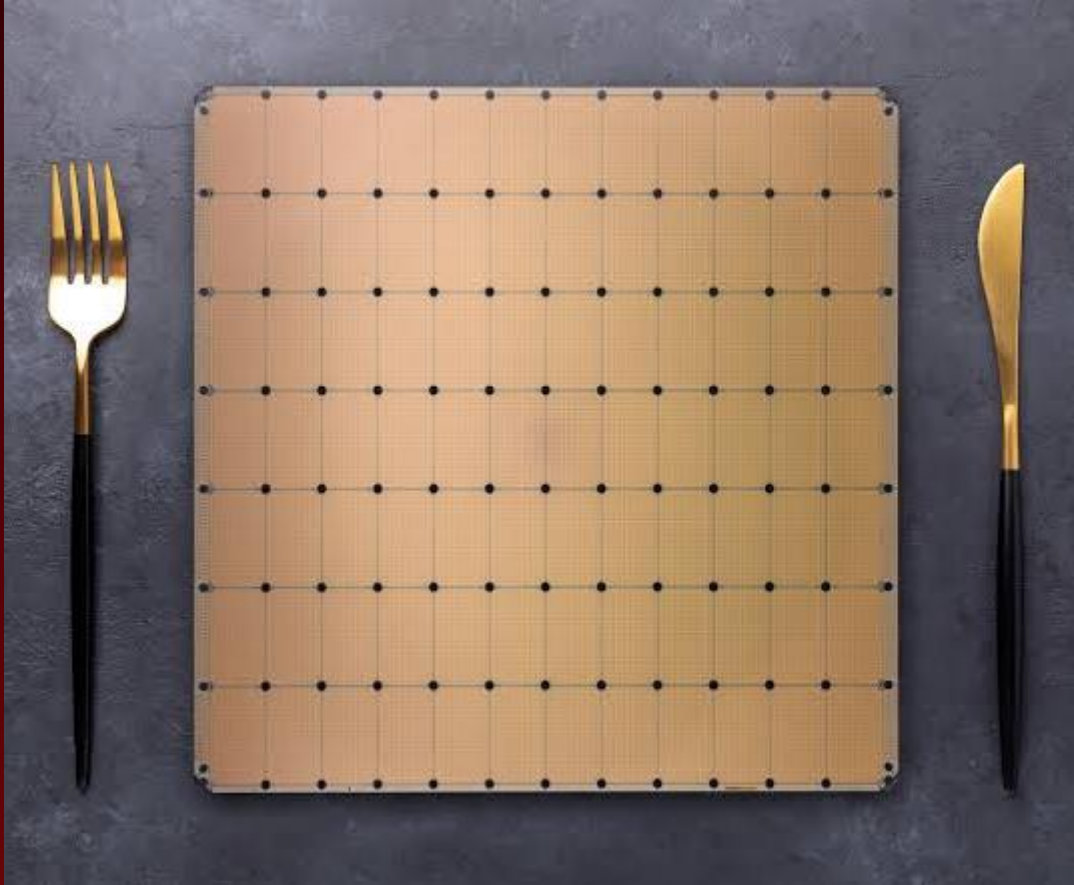

Cerebras WSE Delivers 2,625x More Memory Bandwidth than NVIDIA's B200 Package, Resulting in Up to 15x Faster Inference Speeds

The WSE puts massive amounts of high-performance SRAM directly on the wafer. **Faster memory, closer to compute, delivers faster results.**

Cerebras In Summary

Cerebras is the fastest inference provider in the world
– up to 15x faster than Nvidia

Powers OpenAI, the world's #1 AI Company

Chosen by AWS, the world's #1 AI Cloud

Solved technical problems many thought impossible

Available on premise and through hyperscalers and
the Cerebras Cloud

The image shows a long, narrow aisle in a server room. On the left, a black server rack is visible. The top of the rack features the Cerebras logo, which consists of three concentric orange arcs to the left of the word "cerebras" in white lowercase letters. Below the logo, the text "WORLD'S FASTEST AI INFRASTRUCTURE" is written in white, all-caps, sans-serif font. The rack itself is filled with various electronic components, including red and black cables, and a series of orange and blue lights along the bottom edge. The floor is a light-colored, reflective material. In the background, more server racks and the ceiling structure are visible, creating a sense of depth.
